Editorial Index to Volume 213
January to December 1985

A
Allied Steel & Wire
Profitability for Allied Steel & Wire by reducing costs. 605
Annual Technical Review
Austria; Belgium; Bulgaria; Czechoslovakia; Finland; France. 366
German Democratic Republic; Federal Republic of Germany. 372
Holland; Hungary. 374
Ireland; Italy; Luxembourg; Norway; Poland; Portugal; Romania. 378
Spain; Sweden; Switzerland; Turkey; United Kingdom. 380
Yugoslavia. 384
Austria — squeezed between the EEC and the Eastern bloc. 610

B
BISPA Annual Review
High scrap prices and state subsidies pose problems ahead by Mr Brian Insch, President of BISPA. 103
Brighter future for independents. 104
Improving energy efficiency in the private steel sector. 104
BISPA Annual Report. 105
£1M capital investment for Manchester Steel. 112
British Rolling Mills refines facilities. 112
Firsteel installs electrogalvanising plant. 112
£1.5M profit reported by Lee Group whilst investment continues. 115
DSRM expands export markets. 115
TWIL modernises wire drawing and galvanising. 115
£0.75M furnace investment for Cardiff Rod Mill. 116
Barworth orders 30% over budget. 116
Internal insulation of reheating furnaces with ceramic fibre. 116
Black Country Rolling Mill Commissioned by Keith Gale. Aug 394
British Steel Corporation
Measurement and inspection of hot bar at BSC. 84
Established best practice used at BSC Redcar coke oven rebuild by J H Carr and L A Watson. 190
Project Crest at BSC Clydesdale. 226
Securing Ebbw Vale's crane rails. 283
Electromagnetic stirring at BSC Rotherham Works by P C Gibbins and R J Dawson. 284
Seamless tube production at BSC Bromford Works by Brian Cooper. 316

C
US coke-making technology. 292
Coke ovens
On the development of gas-tight coke oven doors by Dipl.-Ing H Dürselen and Dipl. -Ing W Faust. 494
Formed coke pilot plant completed at Nippon Steel's Yawata Works. 292
Continuous Casting
Operation and quality results of the No 3 slab caster at Sumitomo's Kashima Steel Works by T Ueda, T Kobayashi, T Kimura and M Yamashita. 215
Continuous casting and rolling using the rotary caster. 223
Project Crest at BSC Clydesdale Works. 226
Quality and productivity improvements in slab casters. 230
Computerised continuous bloom caster of Maximilianshütte mbH. 231
Far East orders for Mannesmann Demag. 233
Voest-Alpine's CC building programme. 234
Kobe Steel to build BHP's continuous bloom caster at Newcastle Works. 234
New orders for Danieli conticasters. 234
Experience with horizontal continuous casting plants. 237
Refractory developments for cc. 237
Hoogovens order twin casting machine. 237
Spain's largest bloom caster in operation. 237
Developments in high-production continuous slab casters. 343
Electromagnetic strand stirring of CC billets by L Pochmarski, K Abendstein and W Polanschütz. 504
Controlled pressure pouring plant at Campi Works (Genoa) of Nuova Italsider by R Olcese and G Ferla. 396

D
Davignon
European steel after Davignon by Rick Pendrous. 602
Developments in French steelmaking ATS conference. 78
DSRM reports a record year. 342
Duplex stainless — Advanced. 39

E
Electric arc furnaces
EAF steelmaking and raw material trends. 476
12 years of dc arc furnace development leads to US order by Sven-Einar Stenkvist. 480
High current multiple electrodes for use in arc furnaces by J E Harry and R Knight. 486
Continuous EAF process developed by Intersteel Technology. 490
DC arc furnaces — a status report. 491
Three-step scrap preheating facility developed EBT furnaces gain wide acceptance. R&D yields a new concept in high pressure contact pads. 493
European steel — is there a technology gap? by Jonathan Aylen. 562

F
Ferroalloys
Start-up of the ferrochrome plant in the Philippines by W Schiffer. 335
Falconbridge to expand Norwegian nickel refining. 337
Mannesmann Demag to supply Fe-silicon plant to China. 337
Elkem's strengths due to cheap energy and raw materials. 339
Flat rolling
Advances in cold rolling technology. 552
Automatic flatness control using a VC roll by C D Collinson and Dr T A Gore. 555
'Z'-high concept offers economical up-dating of existing mills. 558
Federal Republic of Germany
The integrated steelmaking plants of West Germany. 157
Arbed Saarstahl. 158
Hoesch Stahl AG. 160
Klöckner-Werke. 164
Krupp Stahl AG. 167
Klöckner-Werke orders continuous car type reheating furnace. 170
Maximilianshütte. 173
Peine/Salzgitter. 176
Thyssen Stahl AG. 176
Fuel Management in the Blast Furnace
Reduced coke consumption in the blast furnace through coal injection. 585
Coke substitution at Kawasaki Steel. 591
Heat recovery in blast furnace stove plants by Dr.-Ing Peter Heinrich. 593
Ceramic valve for controlling hot blast. 598
Raw materials evaluation system developed.
Plasma torches reduce BF coke use. 599

H
The Hot Link
Continuous casting-direct rolling technology at Nippon Steel's Sakai Works by Masaji Kase, Kenji Matsuzuka, Hidemitsu Takahashi, Hanji Oba, Osamu Hirata. 286
MDH/Hitachi Zosen know-how to establish the hot link at Kwangyang. 276
Hot direct rolling at NKK's Fukuyama Works. 280
Modernisation of the HSM at Hoesch Hohenlimburg, will allow direct charging. 280
Hot roll quality of direct charged slabs maintained by work roll shifting. 281
Maxhütte's fully automatic continuous billet casting plant hot charges the furnace. 281
Conversion of the continuous slab caster of Fabrique de Fer. 281
Heatproof paint for steel marking. 281
Reheat furnace designs for hot charging at BHP's Newcastle Works. 283
Port Talbot HSM pipework. 283

I
Institute of Metals holds first AGM in London. 344
Irish Steel — Gloomy future. 248
Iron ore capacity adapts to demand. 244

M
The status of magnesium as a desulphuriser and refining agent in iron and steel by C Wasberg. 288
Manchester Steel — Sidelift solution to billet handling problem. 242
Mechanical handling
Improvement in overhead cranes created by anti-swing technology by Christopher Blackstone. 333
Metal Flow Control
New mould level control system for cc plants. 68
Automatic casting with tundish slidegates on multistand cc machines by Bernhard H. Knell. 73
Microwave sensing for mould level control. 75
Electromagnetic level indicator system for molten metals. 75
Tundish steel flow control using slide gate systems. 76
Metals Information
Facts at your fingertips by James van Oosterom. 130
Modern Coke Oven
Adaptation of the coking industry to present and future demands by Dr. -Ing G Nashan. 179
Variable-width hearth oven for coke research. 186
Inauguration of the Acominas coke ovens. 188
Coke oven rebuild for Rouge Steel. 189
Established best practice used at BSC Redcar coke oven rebuild by J H Carr and L A Watson. 190
The large-capacity coke oven by Dr. -Ing Günter Meyer. 243

N
NASS Conference
Steel Stockholding improvements reflect upturn in the UK economy. 400
Profitability must be greater to permit investment. 408

O
Ore preparation and supply
Western world ore supply will lead demand. 13
Carajas iron ore product nears completion. 16
NKK-CORAC process for continuous rapid curing of cold bonded pellets. 17
Bahrain pelletising plant nears completion. 21
Benefication of ferrous ores using Lurgi technology. 21
Oxygen Steelmaking
Developments in mixed gas blowing by Dr M Motlagh. 532
Worldwide Oxygen steelmaking capacity by J K Stone. 538
Accurate lining wear control through lasser technology by K. Nilsson. Nov 544

P
Pipe and Tube Making.
Seamless tubes production at BSC Bromford Works by Brian Cooper. 316
A review of the production processes for seamless tubes by Dipl-Ing Karl Oberem. 320
The PSW, a high-reduction plant for the production of seamless tubes. 327
Flying saw losses reduced by control system. 330
Galvanising weld area on seam-welded tube. 330
Profile and section rolling
Planning and operation of universal beam and rail mills, with particular reference to thermomechanical rolling by Dr. Wolfgang Mudersbach. 59
Safer section straighteners. 60
Application of CAD/CAM to the rolling of long products by M de Vathaire, E Liegeon and A Faessel. 62

Current developments in medium-section mills. 65

Q
Quenching technology — advances in. 37
Quest for Quality
On-line inspection of hot slab surfaces and internal defects by Masao Nakakura. 23
On-line inspection techniques reviewed at ATS meeting. 32
Surface inspection of cast billets. 35
Measurement and inspection of hot bar at BSC. 84
Eddy Current molten steel level meter with a small detecting head. 240
Analysers for the steel industry by T Mannerings, J Greenwood and P Rice. 295
Steel aims for on-line analysis. 454
Hoogovens commissions vacuum degassing installation. 455

R
Reheating Furnaces
Induction heating of slabs at SSAB Luleå by Carl-Henrik Svanberg. 119
Slab temperature profile measurement in pusher furnaces. 120
Microprocessor based reheat furnace control. 122
Induction reheating of slabs and other workpieces prior to rolling by R.J. Bemis and D.H. Martin. 125
Recuperation trends on large steel reheating furnaces. 128
UK's largest walking beam furnace proceeds on schedule. 128
Robot used to increase productivity of tundish tiles. 291
Roll turning tooling-advances in. 246
Russian seamless pipe works contract awarded to Italy. 609

S
Scrap consumption in the oxygen converter by Bernard Trentini. 608
Secondary steelmaking for product improvement. Report of the Metals Society Conference. 36
Service Centre
Addison-new model launch includes blade deflection monitor. 44
Four years to £3m for G F J Armstrong. 89
Marketing drive of 12% Cr steel launched in UK. 300
NASS lobbies Chancellor on infrastructure spending. 135
Expansion at Downings Steel extends hollow sections stock. 136
Dedicated computerised systems for steel stockholders improves order processing. 198
Wyko takeover provides additional range of metal processing equipment. 254
NASS says 'Subsidy regime must continue. 350
Rivers goes upstream. 351
World's widest stainless steel products. 409
ASD orders information processing network. 462
Railfreight improves its Service to Midland Stockholders and Consumers. 515
Full computerisation at RDM. 570
New distributor for Pro-Eco processing lines. 572
GKN Steelstock invests £1.7M in flat rolled division. 614
Hall & Pickles invests in Norwich. 615
New shape meter for plate and sheet by Dr U Langer and K Rechberger. 607
Soviet Union
Progress in the Soviet steel industry by Brian Cooper. 386
Space age technology for the steel industry. 294
Strip Coating
Market development for coated strip 414
Zinc coated sheet-more tons and types by F C Porter 424
Shotton invests with authority in Sceptre 428
Voest-Alpine AG builds Gravitel electrolytic strip galvanising line 433
Coating of strip steel with zinc by evaporation processing by Prof Dr rer nat S Schiller, Dr.-Ing H Förster, Dr habil G Hötzch, Dr rer nat G Jäsch 437
Non-oxidising furnace for continuous hot-dip galvanising line 439
Low coating mass tinplate improves cost effectiveness 442
An update of pretreatment plant for coil coating lines by P J Brunt 446
Coil coated sheet: a better mousetrap and a better sermon by Ed Crockett 450
Recent developments in coil coating technolocy by T Käär 451
